Your Partner In Infection Control

Tubercle bacillus, P. aeruginosa, E.coli, HIV, HBV, Aspergillus niger, Candida albicans

Composition

Each 100 gms Contain
2 - Propanol IP 45 gms
I - Propanol BP 30 gms
Cetyl Trimethyl Ammonium Bromide 0.3 gms
Approved Colour

Packing

100ml	60 bott./carton
500ml + D	20 bott./carton
5 ltrs.	4 cans / carton

- Alcohol solutions containing 60 to 80% alcohol are most effective.¹ Lipophilic viruses like HIV, Influenza, Vaccinia, Herpes simplex are susceptible to alcohols. Hepatitis-B is killed by 60-70% alcohol.²
- Alcohol based products reduce the number of MRSA recovered from hands of health care workers more effectively.³
- US FDA Approved Tentative Final Monograph for Healthcare antiseptic Drug Products (TFM) - recommends alcohol solution containing limited amounts (0-0.5%) of quarternary ammonium compound for hand antisepsis.
